The SSL Certificate has expired.

```
% curl https://docs.openvz.org
```

```
curl: (60) SSL certificate problem: unable to get local issuer certificate
```

```
More details here: https://curl.se/docs/sslcerts.html
```

curl failed to verify the legitimacy of the server and therefore could not establish a secure connection to it. To learn more about this situation and how to fix it, please visit the web page mentioned above.
