Here it is .
I installed on RHEL4 openvz kernel rpm and rebooted with it

[dagr@mydbtest templates]$ uname -a
Linux mydbtest.ipcb.msk 2.6.8-022stab078.14-smp #1 SMP Wed Jul 19 16:13:15 MSD 2
006 i686 i686 i386 GNU/Linux

////////////////////////////////
Then installed utils : vzctl-3.0.11-1.i386.rpm vzctl-lib-3.0.11-1.i386.rpm vzquota-3.0.8-1.i386.rpm
//
Then i tried install template utils :
vzpkg-2.7.0-18.noarch.rpm
vzrpm43-4.3.3-7_nonptl.6.i386.rpm
vzrpm44-4.4.1-22.5.i386.rpm
vzyum-2.4.0-11.noarch.rpm

vzyum-2.4.0-11.noarch.rpm and vzpkg-2.7.0-18.noarch.rpm failed .
[dagr@mydbtest templates]$ sudo rpm -ivh vzyum-2.4.0-11.noarch.rpm
warning: vzyum-2.4.0-11.noarch.rpm: V3 DSA signature: NOKEY, key ID a7a1d4b6
error: Failed dependencies:
    cElementTree.so is needed by vzyum-2.4.0-11.noarch
    python-sqlite is needed by vzyum-2.4.0-11.noarch
    urlgrabber is needed by vzyum-2.4.0-11.noarch

//
in this forum i have read that i need to install corresponding rpms: python-urlgrabber , etc - Fedora has them - RHEL doesnt.
So i just tried fedoras rpms but got conflicts because of different python versions in fedora and rhel . So the question is - how install vzyum-2.4.0-11.noarch.rpm on RHEL4 ?
