Subject: [PATCH] gentoo vz.initd ve0 setup
Date: Wed, 21 Jun 2006 13:59:29 +0400
From: Kir Kolyshkin <kir@openvz.org>
To: hollow@gentoo.org, Christian Heim <phreak@gentoo.org>
CC: devel@openvz.org

The attached patch adds VE0 setup functionality to /etc/init.d/vz script
for Gentoo. This will work with vzctl >= 3.0.10.

Changes are mimicking those in this changeset:
http://git.openvz.org/?p=vzctl;a=commitdiff;h=5543be319f58dbc4569bf4a5eb2f0fc86cab039e

The idea is to let the user set VE0 (hardware node) UBC parameters if he
likes to. To that effect, he should edit
/etc/vz/conf/0.conf and set ONBOOT=yes, and then set the appropriate
parameters. To apply, new option --reset_ub of vzctl set command is used.

I tried to use your coding style.

Please apply.
