Thanks, it works great now. Here are the values I used hopefully this will help others who want to run cPanel.

```
vzctl set 21652824 --vmguarpages=32768 --save  
vzctl set 21652824 --kmemsize=6400000 --save  
vzctl set 21652824 --privvmpages=80000 --save  
vzctl set 21652824 --numproc=350 --save  
vzctl set 21652824 --tcprcvbuf=540000 --save  
vzctl set 21652824 --dgramrcvbuf=150000 --save
```

where 21652824 is the VPS ID
