Hello,

Quote:So, the question is: is the above correct?

You're right! Above is correct.

Quote:

What is the VEID.start script I have been advised to use, and where is it supposed to be placed?

Such files should reside in /et/vz/conf/ directory.

This script runs inside Virtual Environment after VE start.

Quote:Where can I configure what scripts to run on the host machine (or HW node, excuse my Xenism...) on VE startup? I must add veth-s to a bridge.

At the moment there is no such script. There are plans about creating such file in the near future. BTW, what name for the this file do you suggest? We have some disputes about it...

Thanks!
