thats for vmstat 5 but iostat gave
[~]# iostat -k 5
-bash: iostat: command not found

and free -m says

```
free -m
      total      used      free   shared  buffers   cached
Mem:      976      949        27        0        26      319
-/+ buffers/cache:      603      373
Swap:      4000      166     3833
```

im sorry im new to vz i just want to prevent one vps from making the Hardware node to reach high values and slows down everything

thanks for your help
