I apologize for that.

My previous post about 10.10.x.x is just an example.

Please disregards 10.10.x.x range as it is only an example.

The correct range for a 255.255.252.0 subnet mask is

10.2.4.0 - 10.2.7.255

Kernel IP routing table

| Destination | Gateway | Genmask | Flags | Metric | Ref | Use | Iface |
|-------------|---------|-----------------|-------|--------|-----|-----|--------|
| *.*.*.27 | 0.0.0.0 | 255.255.255.255 | UH | 0 | 0 | 0 | venet0 |
| 10.2.5.2 | 0.0.0.0 | 255.255.255.255 | UH | 0 | 0 | 0 | venet0 |
| *.*.*.240 | 0.0.0.0 | 255.255.255.255 | UH | 0 | 0 | 0 | venet0 |
| *.*.*.0 | 0.0.0.0 | 255.255.255.0 | U | 0 | 0 | 0 | eth0 |
| 10.2.4.0 | 0.0.0.0 | 255.255.252.0 | U | 0 | 0 | 0 | eth1 |
| 169.254.0.0 | 0.0.0.0 | 255.255.0.0 | U | 0 | 0 | 0 | eth1 |
| 0.0.0.0 | *.*.*.1 | 0.0.0.0 | UG | 0 | 0 | 0 | eth0 |

note: *.*.* = is a public subnet.
