Hello,

Sorry for delay, we have some holidays here.

As you see the problem is in routing:

Quote:[10:03:45][~]> ip r get 11.22.33.44

local 11.22.33.44 dev lo src 11.22.33.44

cache <local> mtu 16436 advmss 16396 metric 10 64

[10:04:11][~]> route -n

Every packet that goes to VE (11.22.33.44) thanks to routing goes to lo interface, but should go to venet0.

The question is why this happens?

I'll think about it.
