Sorry the late answer.

Did you get this problem solved?

I have created a little vzmound/vzumount program.

As it mounts the filesystem as simfs, it works with checkpointing.

Attached file.

```
gcc -o vzmound vzmound.c
```

```
In vzmound vzumount
```

```
./vzmound /source/dir /destination
```

```
./vzumount /destination
```

Regards,

Kristian Høgh
