.config from 2.6.18-ovz:

CONFIG_MD_RAID456 is not set

it looks like the option name was changed (there were separate options for RAID 4,5,6) and this caused it to be lost.

please, recompile a kernel with this options set.

I added bug:

http://bugzilla.openvz.org/show_bug.cgi?id=360

so that next kernel will have a fix.
