Hi,

I have two VEs setup correctly and I am running mysql daemon in one VE. I can connect to the mysql daemon from HN but cannot connect to it from the other VE or from outside. On the other hand, I can ping the machine and even ssh into it. The setup is as follow.

I assign 15.25.117.{48,49} to the VEs and 15.25.117.31 is the HN's ip address.

Run mysql in 15.25.117.49. Now, in 15.25.117.48
-bash-3.1# mysql -h15.25.117.49 -utest_rubis
ERROR 2003 (HY000): Can't connect to MySQL server on '15.25.117.49' (113)

On 15.25.117.31
[root@acts-01-eth1 ~]# mysql -h15.25.117.49 -utest_rubis
Welcome to the MySQL monitor. Commands end with ; or \g.
Your MySQL connection id is 6 to server version: 5.0.27-standard

Type 'help;' or '\h' for help. Type '\c' to clear the buffer.

mysql>

Let me know how to fix this problem. Thanks !
Pradeep
