```
[root@host home]# sh latest
Creating directory install
Verifying archive integrity... All good.
Uncompressing cplyr1-cPanel.....
```

```
.....
.....
.....
.....
```

```

Installer Version 10.6.0

cat: /boot/System.map*: No such file or directory
Your operating system's rpm update method (yum) was not able to locate the glibc package. This is an indication of an improper setup. You must correct this error before you can proceed.
