Good info, thanks! Here is a script that will do this for all your VE's on a given hardware node:

```
#!/bin/bash
#for f in 103 305 801 802 811 820 1037 2207 2209 2210
for f in `ls /vz/private`
do
    vzctl exec $f rm -rf /etc/localtime 2>/dev/null
    vzctl exec $f unlink /etc/localtime 2>/dev/null
    vzctl exec $f ln -s /usr/share/zoneinfo/CST6CDT /etc/localtime
done
```
