This output of the last command looks rather odd:

reboot	system boot	2.6.16-026test01	Wed Dec 20 22:24	(1+10:20)
reboot	system boot	2.6.16-026test01	Wed Oct 25 21:58	(57+10:46)
reboot	system boot	2.6.16-026test01	Mon Jul 17 02:32	(158+06:12)
reboot	system boot	2.6.16-026test01	Mon Jul 17 02:31	(00:00)

Any ideas why reboot is logging in?
