hi guys....this is Nikhil....

im using FC5 for openvz....but got confused abt kernel version to use for installation. There r many kernel version given in the download section.....so not getting which one to use.....!

can u plz tell me which one to use.....or if possible plz give me the link for downloading the same.....!!!

In the FC5 tips it is given to use kernel having "test" in its name....but there r too many such rpms given there.....so plzzzz
help me out.....!!

plzzz reply as early as possible...!!! Thanks....in advance
