All,

I have installed openvz on a dell box 1950 and use kernel version 2.6.18-ovz028test005.1-smp when I restart the linux box I get the following error.

syslog;
- udevd[967]: add_to_rules: invalid KERNEL operation
- add_to_rules: invalid rule '/etc/udev/rules.d/60-vzctl.rules:1'

I use FC6

please advise.

John
