Sorry for the late response.

I just ran a test. I had one VE with a 14MB wtmp file

Here is my output of last

```
reboot  system boot  2.6.16-026test01 Wed Jan 10 05:10      (00:00)
reboot  system boot  2.6.16-026test01 Tue Jan  9 06:49      (22:20)
```

wtmp begins Tue Jan 9 06:49:50 2007

I restarted the VE and the wtmp file still remains at 14MB.

Any ideas?
