Hello,

My hardware é REDHAT ENTERPRISE 64 BITS.

My kernel is: 2.6.9-023stab037.3-smp

vzctl: vzctl version 3.0.11

I created VM, instaled CPANEL and restored accounts via backup. After aprox. 10 min, ssh of NODE no accessible. In ssh of NODE, inform:

```
[root@cluster daily]# w  
Segmentation fault
```

This is only NODE. VMs is normal. If i reboot hardware, problem continue after start this VM (witch cpanel).
