Thx ,i has try again and when i use this command

```
usr/local/sbin/vzctl create 101 --ostemplate fedora-core-5-i386-minimal --config vps.basic
```

Unable to open /dev/vzctl: No such file or directory

Please check that vzdev kernel module is loaded and you have sufficient permissions to access the file.

it show that.

I can't understand why pl tell me.Sorry cause if disturb you
