Hello,

For me this example doesn't work either,  
so I use the following script instead /sbin/init:

```
#!/bin/sh
export CONSOLE=/tmp/init.log
exec /sbin/init.real $*
```

/sbin/init.real is the copy of original /sbin/init

Note, that /tmp/init.log resides in VE, and is overwritten  
each(!) time you start VE.

HTH,  
Vasily.
