Hi,

When i restart ubuntu with OpenVZ i have this kind of error.

* Reconfiguring network interfaces...
ssh stop/waiting
ssh start/running, process 1659
status: Unknown job: smbd
ssh stop/waiting
ssh start/running, process 1682
status: Unknown job: smbd
ssh stop/waiting
ssh start/running, process 1707
status: Unknown job: smbd
...done.

I have searched over google but nothing, i didnt find any cause to this and i am not understanding why is this happening.

Please let me know
