How do I pass a device to a VE using the by-id link

vzctl set 3261 --devnodes /dev/tape/by-id/scsi-200900de606413000:rw
Bad parameter for --devnodes: /dev/tape/by-id/scsi-200900de606413000:rw

Richard

You should cut "/dev/":
vzctl set 3261 --devnodes tape/by-id/scsi-200900de606413000:rw
