Subject: Missing changelogs in kernel.spec

Just downloaded the new stable kernel:

http://wiki.openvz.org/Download/kernel/rhel6/042stab053.5

But the last changelog entry is:

%changelog
* Thu Jan 19 2012 Frantisek Hrbata <fhrbata@redhat.com> [2.6.32-220.4.1.el6]

I thought this should be 2.6.32-220.7.1.el6? So what version is that kernel exactly?

- Dietmar

Hi Dietmar,

well, yes, we've forgot to update the RHEL's changelog in spec file.
Thank you for the report, we'll fix it in the next kernel.

053.5 is definitely based on 2.6.32-220.7.1.el6.
