Hi everyone,

I want to make DirectAdmin backup to other HDD on /dev/sdb1 (I mount on /backup)

The DirectAdmin are running on OpenVZ container.

What the path I must set in DirectAdmin Backup/Restore Menu.

I can do this or I must to use Backup features from OpenVZ only?

Please help or suggestion me to do this.

I'm a newbie on OpenVZ and Linux.

Best Regards,
iLhay
