Subject: sharing directory between two VE

Hi,

For the purpose of a migration, I'd need to share a directory between two VE, context 1 and 2. I've tried, with no success:

- mounting /tmp/shared.ext2 from the host to both guests using simfs and -o loop
- mounting --bind /tmp/shared.dir from the host to both guests using mount --make-shared
- mounting --bind from the 1st VE to the 2nd

Is there another way to try ... ?

Using vserver, I used to change the context of the files, does OpenVz offer this capability ?

Best Regards,

Olivier

Bind mount from ve mount script solves this problem...

Sent from my iPhonespam SPAMSPAM

Hi, I use fuse to mount remote filesystem over ssh. Works smoothly.

In HN:/etc/fstab
/dev/sda1 /shared ext4 defaults 1 3

And in containers mount files
ctid.mount:
[-d ${VE_ROOT}/mydir] || mkdir ${VE_ROOT}/mydir
mount -o bind /shared ${VE_ROOT}/mydir

ctid.umount:
umount ${VE_ROOT}/mydir 2> /dev/null || echo -n ""

Greetings
