Subject: ploop - Showing disk space usage / limits

So I finally got an opportunity to reboot into a ploop-enabled kernel
and started to play around with a ploop container a little.

I have a problem to get vzlist to show the disk space details though,
such as explained on the http://wiki.openvz.org/Ploop/Getting_started
page under "Showing disk space usage / limits":

vzlist -o smart_ctid,dspace.u
Unknown field: dspace.u

I'm using vzctl-3.3-1.x86_64 and 2.6.32-042stab059.7 #1 SMP

It's diskspace.u.

Please fix wiki accordingly

vzlist -o smart_ctid,diskspace.u
Unknown field: diskspace.u

type vzlist
vzlist is hashed (/usr/sbin/vzlist)
rpm -qf /usr/sbin/vzlist
vzctl-3.3-1.x86_64

in true it's diskspace
so it should be
vzlist -o smart_ctid,diskspace

fixed in wiki

vzlist -L gives you the list of fields, you go from where
