Hello!

I am new to OpenVZ but I cant get my head around this problem: whenever I stop a VE my connection on my HN disappears. I get the following message in my messages log:

Quote:Sep 13 19:33:32 localhost avahi-daemon[2229]: Interface venet0.IPv4 no longer relevant for mDNS.
Sep 13 19:33:32 localhost avahi-daemon[2229]: Leaving mDNS multicast group on interface venet0.IPv4 with address 192.168.1.38.
Sep 13 19:33:32 localhost NetworkManager[2211]: <info> (eth0): carrier now OFF (device state 8, deferring action for 4 seconds)
Sep 13 19:33:32 localhost avahi-daemon[2229]: Withdrawing address record for fe80::1e6f:65ff:fea2:eac0 on venet0.
Sep 13 19:33:32 localhost avahi-daemon[2229]: Withdrawing address record for 192.168.1.38 on venet0.
Sep 13 19:33:32 localhost kernel: [483.309235] CT: 50: stopped
Sep 13 19:33:36 localhost NetworkManager[2211]: <info> (eth0): device state change: 8 -> 2 (reason 40)
Sep 13 19:33:36 localhost NetworkManager[2211]: <info> (eth0): deactivating device (reason: 40).
Sep 13 19:33:37 localhost NetworkManager[2211]: <info> (eth0): canceled DHCP transaction, DHCP client pid 2433
Sep 13 19:33:38 localhost ntpd[2473]: Deleting interface #6 eth0, 192.168.1.38#123, interface stats: received=22, sent=22, dropped=0, active_time=473 secs

Any idea how to stop this from happening? I am clueless
