
Subject: [PATCH v6 05/10] ipc: add new MSG_SET command for sys_msgctl() call
Posted by [Stanislav Kinsbursky](#) on Mon, 15 Oct 2012 16:00:01 GMT

[View Forum Message](#) <> [Reply to Message](#)

New MSG_SET command will be interpreted exactly as IPC_SET, but also will update key, cuid and cgid values. IOW, it allows to change existent key value. The fact, that key is not used is checked before update. Otherwise -EEXIST is returned.
