Subject: libcgroup issue for EL5 users

Due to complains that on an RHEL5/CentOS5 system libcgroup package from OpenVZ utils repository now upgrades the package from EL5, I have downgraded libcgroup in OpenVZ repo down to 0.37-4.

Note that libcgroup is currently only used by vzctl when it's working on a non-OpenVZ kernel (i.e. recent upstream kernel like 3.5).

Thanks,  
Kir.
