HI,
I found vz is really great!

But I cannot change vps's time seperately.
I created 2 vps in vz.

vp1:192.168.3.101,
vp2:192.168.3.102,

I want to change vps' datetime :
vp1: 15:30 am Jan 30 2013
vp2: 12:00 am Feb 20 2013

when I changed vp1's date, vp2 changed too.
How can I do it seperatly?

The server should have one time. What you need to do is set the TIME ZONE inside the container (VPS), not the time.

Each container can have its own time zone settings.

change Time zone cannot help me.

the vps times is different not only in time zone, but also days ,minute.

setting different time zone, just make 23 hours aways.
