Hi,

I created CentOS6.3 VM on Azure, and trying to install OpenVZ but got below error.

Does anyone faced same error? How can I avoid this?

[ebiken@openvz01 ~]$ uname -a
Linux openvz01 2.6.32-279.14.1.el6.openlogic.x86_64 #1 SMP Wed Dec 12 18:33:43 UTC 2012 x86_64 x86_64 x86_64 GNU/Linux

[root@openvz01 ebiken]# wget -P /etc/yum.repos.d/ http: //download.openvz.org/openvz.repo
[root@openvz01 ebiken]# rpm --import http: //ftp.openvz.org/RPM-GPG-Key-OpenVZ

Enabled [openvz-kernel-rhel6-testing] in /etc/yum.repos.d/openvz.repo

[root@openvz01 ebiken]# yum install vzkernel
Loaded plugins: security

Error: Package: vzkernel-2.6.32-042stab080.11.x86_64 (openvz-kernel-rhel6-testing)
Requires: kernel-firmware >= 2.6.32-358.14.1.el6
Installed: kernel-firmware-2.6.32-279.14.1.el6.openlogic.x86_64 (@openlogic)
kernel-firmware = 2.6.32-279.14.1.el6.openlogic
Error: vzkernel conflicts with bfa-firmware
You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest

sorry for delayed reply, but maybe it would be helpfull.
as I understand it just have strict dependencies, so probably disabling vzkernel-firmware will solve a problem:

Edit:
I'm an idiot and the fix on wiki.openvz.org/Vzkernel-firmware works (didn't save the file)...
Please ignore this post.

I know this is an old thread but I'm having this issue and I don't have vzkernel-firmware enabled.

Any help welcome.

Edit: Some info
Running CentOS 6.7 on Azure

Error: vzkernel conflicts with bfa-firmware

so try to use --skip-broken option, or figure out if it is an option avoid bfa-firmware package and remove it
