It's old news by now, but I thought I'd post this here - RHEL 7 beta 1 has been released to the public, with kernel-3.10.0-54.0.1.el7

http://ftp.redhat.com/redhat/rhel/beta/7/

So... RHEL's 3.10.x is what we'll be using with openVZ too... I know there is a bunch of people impatient to see this happen soon, but it's probably not going to be tomorrow...
