hello guys,
i have buy a vps in Chicago (i don't write the website because i think is a spam ) however, i have set the tunnel broker (Hurricane) and if i try to ping6 ipv6.google.com working...but if i try to ping the ipv6 from external machine don't ping, and if i try to irrsi with that ipv6, he say "connection timeout"...i think is a gateway problem..but you are the expert and i wait your response.
Thank you!

PS: i have installed the tunnel with tb_userspace.
