Hello, I have problem with broken symlink in /lib/modules/2.6.32-042stab084.25/ . build -> ../../usr/src/kernels/2.6.32-042stab084.25

```
# ls -la /usr/src/kernels/
```

```
total 12
```

```
drwxr-xr-x. 3 root root 4096 Nov 29 10:24 .
```

```
drwxr-xr-x. 4 root root 4096 Nov 28 14:54 ..
```

```
drwxr-xr-x 22 root root 4096 Nov 29 05:51 2.6.32-431.5.1.el6.x86_64
```

I have installed:

```
vzkernel-headers-2.6.32-042stab084.25.x86_64
```

```
vzkernel-2.6.32-042stab084.25.x86_64
```

I need compile some sources, but is not possible because build symlink is broken.

I think you need to install vzkernel-devel
