Subject: 042stab084.26 Stable?

Hi,

The OpenVZ website is currently showing 042stab084.25 as the latest stable version for RHEL6.

However, when performing a 'yum update' on my OVZ servers it is downloading 042stab084.26, which is still showing as 'testing'.

Any ideas of what is going on? Is it just a case that the website is not up to date?

Thanks,
Mark

Hi,
dunno is it because of your post, or this is something else but today 84.26 announced as stable
