Hello,  
i tried setup openvz for start 3 openvz virtual machine. I have 2 node, with 3 drbd disk.

Can you help me with settings?

Hello and welcome to the forum.

What specific issue are you trying to solve?

Hi,  
a make a some steps. And now when I switch one node in Standby mode, the all resooresource switch on second node. After switch back, all resource get normaly in primary node. Bad if I reboot the primary node, the VZ machine create a error as: res\_ManageVE\_203\_stop\_0 (node=mars, call=57, rc=1, status=complete): unknown error (thi It's the log from crm status).

Any Idea?
