I setup a vm with 200 gb of space and mount it as a extra space for media I link to with sshfs using numerous computers and phones for music and video

vzctl create 10 --ostemplate debian-7.0-amd64-minimal100213
vzctl set 10 --onboot yes --save
vzctl set 10 --hostname data.local.dm --save
vzctl set 10 --ipadd 10.0.0.10 --save
vzctl start 10
vzctl exec 10 passwd

after a bit files start to disappear. i do not know what the heck I would have a 600mb file video and the sub folder would be there but the files are gone

this has been going on now for a long while I started over with this container and did a few things different

:/etc/vz/conf# cat 10.conf
# UBC parameters (in form of barrier:limit)
PHYSPAGES="0:1G"
SWAPPAGES="0:2G"

tmpfs	2.4G	72M	2.3G	3%	/vz/root/118/run/shm

whats going on its like its disappearing cause I am running out of space but no? confused HELP!
8o

I just upgraded kernel uname -r

2.6.32-openvz-042stab102.9-amd64
but this has been going on since the first version that I had going. how and what is the best way to create space that nothing disappears from.

The first thing I notice from the data you've posted is a somewhat low inode limit. Limit of 220000 doesn't seem enough for a busy 200 GB file system. The ext4 defaults for disk inodes equal to 65536 x GiB (1 * 1024 * 1024 / 16). So, for 200 GiB, that would be 13107200. You might not need quite as much, but still... you might very well need more than 220k.

You can check inode usage by running 'df -i' within your VM.

If inodes aren't the cause, are there any other errors / failures in the logs within the VM? Files can't just disappear...

Wow i have always wondered about that I made the changes. time will see. I think I need to learn more what a inode really is.

Do you think because of a low amount of inodes that a file that was there one day would disappear another.

if anyone else is curious of any other settings let me know I will provide I not sure how to explain how to reproduce. but I can go into detail how and what I did to install.
