--> Finished Dependency Resolution
Error: Package: vzkernel-2.6.32-042stab104.1.x86_64 (openvz-kernel-rhel6)
          Requires: kernel-firmware >= 2.6.32-504.8.1.el6
          Installed: kernel-firmware-2.6.32-504.3.3.el6.noarch (@updates)
              kernel-firmware = 2.6.32-504.3.3.el6
 You could try using --skip-broken to work around the problem
 You could try running: rpm -Va --nofiles --nodigest
[root@hwn01 /]#
```

I have 2 excludes inside yum repo's

OPENVZ.repo
[openvz-kernel-rhel6]
exclude=vzkernel-firmware

and inside

CentOS-Base.repo
[updates]
exclude=kernel kernel-smp kernel-enterprise

There is nu new version of kernel-firmware available according to yum, Any help is appreciated.

did you tried
yum clean all

and then update?

The required kernel-firmware 2.6.32-504.8.1.el6 is inside the (not enabled) centosplus chapter CentOS-Base repo.
I believe according to some ftp mirrorlists on internet,

example: h t t p://mirror.centos.org/centos/6/centosplus/x86_64/Packages/

but if I enable or add option installpkgs=kernel-firmware,
or using yum priority's it doesn't get installed or show up as update.

#yum list kernel-firmware
still shows only version 3.3.el6 as latest version

Hello,

try this: h t t p s://openvz.org/Vzkernel-firmware
