Hello,

Just got into a situation where the used space showing is different for the VE. df -h result from the host node and from the inside of VE is throwing different values.

```
[Node ~]# df -h
Filesystem      Size  Used Avail Use% Mounted on
/dev/path 1.7T 1.6T 41G 98% container
```

```
Server [/]# df -h
Filesystem      Size  Used Avail Use% Mounted on
/dev/path 1.6T 968G 579G 63% /
```
