I don't seem to be able to update anything from any of the OpenVZ repositories:

ftp://mirror.datacenter.by/pub/download.openvz.org/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"
Trying other mirror.
ftp://ftp.iij.ad.jp/pub/openvz/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"
Trying other mirror.
ftp://openvz.hitme.net.pl/openvz/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"
Trying other mirror.
ftp://mirror.webtastix.net/openvz/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"
Trying other mirror.
ftp://mirrors.digipower.vn/openvz/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"
Trying other mirror.
ftp://mirrors.ustc.edu.cn/openvz/repodata/repomd.xml: [Errno 14] PYCURL ERROR 9 - "Server denied you to change to the given directory"

Not sure how to fix.

It seems that all mirrors are broken. This also interfere with other yum commands not relating to

openvz. To fix edit /etc/yum.repos.d/openvz.repo comment line mirrorlist= and uncomment baseurl=. Or replace enabled=1 with enabled=0.

Any ideas why this happens?

It seems the problem was due wrong mirrorlist.
Each mirror in list above was pointed to the root directory instead of current directory.
Now mirrorlist was updated, can anyone try to check?

Seems to be fixed now.

Thanks

Guys,

It was a problem with the mirror list generation, which is now fixed. We are very sorry for the inconvenience.
