hello
I have copied a ploop device from backup:

cp -a root.hdd/ /tmp

the I have mounted it:

mount -t ploop root.hdd/DiskDescriptor.xml /mnt/
then I have copied out my files.

the I have unmounted it:

umount /mnt

then I wanted to delete the folder:

rm -r /tmp/root.hdd
rm: cannot remove `/tmp/root.hdd_/root.hdd.{75ff4d1c-1adf-4df1-915b-462e5011fdff}': Operation not permitted
rm: cannot remove `/tmp/root.hdd_/root.hdd': Operation not permitted

when I try to mount it again:
I copy the description files:

cp -a /virtual/vz/private/2035/root.hdd/D* root.hdd

and then:

mount -t ploop root.hdd/DiskDescriptor.xml /mnt/
Error in ploop_mount_image (ploop.c:1882): Image /tmp/root.hdd/root.hdd already used by device /dev/ploop27192
ploop mount -m /mnt /tmp/root.hdd/DiskDescriptor.xml command failed

how can I delete the folder /tmp/root.hdd ?

Thanks for your help!
