Hello,

In the solusvm slaves of one of our servers under /var/log/messages we get this

```
Aug 23 13:32:42 serigo kernel: [14831963.543297] Fatal resource shortage: privvmpa ges, UB 1219.
```

```
Aug 23 13:32:42 serigo kernel: [14831963.543317] Fatal resource shortage: privvmpa ges, UB 1219.
```

Some of the vps are closing network connections
