Hi,

When visiting http://www.openvz.org I get redirected to https://www.openvz.org.
Unfortunately I get a blog.openvz.org certificate presented, causing an error in my browser.

I presume the redirect should have been to https://openvz.org?

Gr, J

What browser do you use?

I have not problem with Firefox and Chromium
https://s15.postimg.org/p8ysf93gr/image.png

May be this is latest Google Chrome issue (Google just banned a lot of global CA, such as WoSign, GeoTrust, StartSSL, ...)

Hi JAlbstmeijer,

right, just use openvz.org for now.

Thank you for the report.

Also https://planet.openvz.org/ is now broken as the domain is missing from the certificate.
