
Subject: ovztransfer.sh fails - 276209: Failed to umount ploop on

Posted by [Jcats](#) on Sat, 22 Apr 2017 15:21:19 GMT

[View Forum Message](#) <> [Reply to Message](#)

```
[root@v17 ~]# ./ovztransfer.sh 192.168.1.222 22256:22256
Checking target host parameters...
Migration of Container 22256 started
Container 22256: Shutting down all possible services...
vzquota : (error) Quota accounting is off
Container 22256: Copying data...
./ovztransfer.sh: line 30: 276367 Terminated          vzctl exec $veid "mount -o bind / $tmpdir; tail
-f /dev/null > $tmpdir/tmp/lock" > /dev/null 2>&1
276209: Failed to umount ploop on 192.168.1.222
Migraton of Container 22256 failed with error 1
All done
Stopping all migration processes...
```

I am migrating from 2.6.32-042stab116.2 to 3.10.0-327.36.1.vz7.20.18

Even though this failed, I still tried to start the container on v7 but it fails as well:

```
[root@v18-ssd-chi conf]# vzctl start 22256
flock lock
