Subject: Problem disk on container

Hello,

I have a server with openvz with 15 containers. My vz partition:

total used free
881G 512G 325G 62% /var/lib/vz

I have a container with 600G disk but when I make a df shows:

Filesystem	Size	Used	Avail	Use%	Mounted on
/dev/simfs	485G	116G	325G	27%	/
devtmpfs	8.0G	0	8.0G	0%	/dev
tmpfs	8.0G	0	8.0G	0%	/dev/shm
tmpfs	8.0G	496K	8.0G	1%	/run
tmpfs	8.0G	0	8.0G	0%	/sys/fs/cgroup
tmpfs	1.7G	0	1.7G	0%	/run/user/0

Only 485G. I see that if I delete containers for free space of vz partition the disk ups. Can you make something to overselling?

A greeting.
