Hello,

I'm trying to do live migration of container, and getting such an error (this happens even with empty test container):

```
[root@vz03 ~]# vzmigrate -vvv --online --require-realtime vz04 222
```

```
...
2018-05-23 10:30:10.732: Live migration stage started
2018-05-23 10:30:36.320: lo multiplexer aborted

```
[root@vz04 ~]# tail -20 /vz/dump/222/rst-_cQGWZ-18.05.23-10.30/criu_restore.9.log
(00.000142) Version: 3.8 (gitid 0)
(00.000188) Running on vz04.boardreader.com Linux 3.10.0-693.21.1.vz7.47.4 #1 SMP Sat Apr
28 11:48:07 MSK 2018 x86_64
(00.000237) No inventory.img image
(00.000283) Error (criu/util.c:694): Can't read link of fd -404: No such file or directory
(00.000295) Error (criu/protobuf.c:77): Unexpected EOF on (null)
```

Both servers run the following openvz version:

```
[root@vz03 ~]# uname -a
```

Linux vz03.boardreader.com 3.10.0-693.21.1.vz7.47.4 #1 SMP Sat Apr 28 11:48:07 MSK 2018
x86_64 x86_64 x86_64 GNU/Linux

```
[root@vz03 ~]# cat /etc/*release*
OpenVZ release 7.0.8 (142)
NAME="Virtuozzo"
VERSION="7.0.8"
ID="virtuozzo"
ID_LIKE="rhel fedora"
VERSION_ID="7"
PRETTY_NAME="OpenVZ release 7.0.8"
ANSI_COLOR="0;31"
CPE_NAME="cpe:/o:virtuozzoproject:vz:7"
HOME_URL="http://www.virtuozzo.com"
BUG_REPORT_URL="https://bugs.openvz.org/"
OpenVZ release 7.0.8 (142)
Virtuozzo Linux release 7.4
OpenVZ release 7.0.8 (142)
cpe:/o:virtuozzoproject:vzlinux:7:ga
OpenVZ release 7.0.8 (142)
Virtuozzo Linux release 7.5.0 (549)
```

If I remove --online --require-realtime options, it works.

avagin on github asks to provide criu_restore.9.log file

Actually criu_restore.9.log was already posted in my first message:

```
[root@vz04 ~]# cat /vz/dump/222/rst-_cQGWZ-18.05.23-10.30/criu_restore.9.log
(00.000142) Version: 3.8 (gitid 0)
(00.000188) Running on vz04.boardreader.com Linux 3.10.0-693.21.1.vz7.47.4 #1 SMP Sat Apr
28 11:48:07 MSK 2018 x86_64
(00.000237) No inventory.img image
(00.000283) Error (criu/util.c:694): Can't read link of fd -404: No such file or directory
(00.000295) Error (criu/protobuf.c:77): Unexpected EOF on (null)
```

I attached the whole /vz/dump/222/rst-_cQGWZ-18.05.23-10.30 dir on github

BTW, can't attach archive here, getting "File Attachment is too big (over allowed limit of 2097152 bytes)", while archive is 200KB.

When will this be integrated in the stable package of Virtuozzo, or even at the factory repo? The last update on the criu package is from 2017.

Having the same issue as described here.

Or would it be OK to compile the package myself? Not sure if this will create more issues?

Subject: Re: online container migration fails with Remote exception I/O operation on closed file

Posted by [alenco](#) on Fri, 22 Mar 2019 19:24:12 GMT

Just tried to compile it to 3.10 and 3.11, but getting an error on that. Probably because p.haul is not working any more with different version than their own package.

Really much appreciated if someone can let me know if there is a way to get this working.

Live migration is simply not working anymore.

I have the same issue.

OpenVZ release 7.0.10 (252)

Virtuozzo Linux release 7.6.0 (618)

Linux name.of.server 3.10.0-957.10.1.vz7.85.17 #1 SMP Thu Apr 11 18:11:44 MSK 2019 x86_64
x86_64 x86_64 GNU/Linux

I run the following command: `prlctl migrate root@192.168.0.1/10012 root@192.168.0.2/10012 -v 10`

Result:

Quote:

05-10 20:49:01.414 W /disp:3647:199402/ handleClientConnected

05-10 20:52:06.650 F /disp:3647:4098/ libvirt error no error

05-10 20:52:06.650 F /disp:3647:4098/ Cannot read host PCI devices: PRL_ERR_FAILURE

05-10 20:52:16.297 F /HostUtils:3647:4098/ Failed to load libpcs_client.so.1: libpcs_client.so.1: cannot open shared object file: No such file or directory

Maybe someone has an idea?

Things I tried and/or looked up:

1. Failed to load libpcs_client.so.1 (= apparently only a warning)
2. VM Directory /vz/vmprivate does not exist (= I created this directory on both source and destination; still same message)

I decided to try something else; I turned the container offline and ran the command: prlctl migrate 10012 192.168.0.2

As a result the container was migrated successfully...

...however, I rather have a live migration if possible.

Maybe someone experienced can see in the logs what is wrong?

Thanks!
