After installing OpenVZ 7 (I've used the latest release 7.0.8-390) I got warnings in /var/log/messages log file:

Oct 4 09:35:41 backup prl_disp_service: 10-04 09:35:41.628 F /HostUtils:2044:2435/ Failed to load libpcs_client.so.1: libpcs_client.so.1: cannot open shared object file: No such file or directory
Oct 4 09:42:54 backup dnsmasq-dhcp[2396]: RTR-ADVERT(virbr0) fdb2:2c26:f4e4::
Oct 4 09:45:41 backup prl_disp_service: 10-04 09:45:41.503 F /disp:2044:2044/ Synchronizing VMs uptime values
Oct 4 09:45:41 backup prl_disp_service: 10-04 09:45:41.504 F /disp:2044:2044/ Synchronization of VMs uptime was completed
Oct 4 09:45:41 backup prl_disp_service: 10-04 09:45:41.637 F /HostUtils:2044:2435/ Failed to load libpcs_client.so.1: libpcs_client.so.1: cannot open shared object file: No such file or directory
Oct 4 09:51:21 backup dnsmasq-dhcp[2396]: RTR-ADVERT(virbr0) fdb2:2c26:f4e4::
Oct 4 09:55:41 backup prl_disp_service: 10-04 09:55:41.717 F /HostUtils:2044:2435/ Failed to load libpcs_client.so.1: libpcs_client.so.1: cannot open shared object file: No such file or directory

Where can I get libpcs_client.so.1 file? Or how can I suppress this warning?

Some details about my centos:

[root@backup ~]# uname -a
Linux backup.somedomain.ru 3.10.0-862.11.6.vz7.64.7 #1 SMP Thu Aug 23 19:33:51 MSK 2018 x86_64 x86_64 x86_64 GNU/Linux
[root@backup ~]# cat /etc/redhat-release
CentOS Linux release 7.5.1804 (Core)

Please use jira fore reporting aboutproblems
I've submitted
https://bugs.openvz.org/browse/OVZ-7062

@r2ar, Please use one of the official installation methods. Replacing the CentOS 7.5 kernel is not supported.
ISO: https://download.openvz.org/virtuozzo/releases/7.0/x86_64/is o/

On what kind of server are you trying to install openvz?
