Containers are set to onboot=true.

However then system boots not all containers (about half or less are running).

It happen with openvz 8 and 9

I am puzzled. SUCCESS of ERROR? or ERROR of SUCCESS. Anyone know how to fix?

I doubt that ordinary openvz users can help in this situation.
Please address noticed troubles to bugs.openvz.org.
Product is in alpha stage and we're happy to see any feedback.

Thank you,
Vasily Averin
