Hello
Some of my clients are getting error, when they compile or install programs on their vps:

Inconsistency detected by ld.so: dl-minimal.c: 84: __libc_memalign:
Assertion `page != ((void *) -1)' failed!
Inconsistency detected by ld.so: dl-minimal.c: 84: __libc_malloc:
Assertion `page != ((void *) -1)' failed!

Though the hardware node is working fine, with no crash etc...

Please guide.

Regards

check if you have enough resources inside VE:

cat /proc/user_beancounters
