Subject: NFS support in 2.6.8-022stab061.1

I Just installed this kernel on centos 4.2 x86_64. I try to start the NFS server (which works beautifully with the RH kernel) and this happens;

Jan 18 20:30:19 services rpc.idmapd: nfsdreopen: Opening '/proc/net/rpc/nfs4.nametoid/channel' failed: errno 2 (No such file or directory)

Any ideas.

Cheers,

Bards.

Sorry, for such a late reply. You need to rebuild a kernel if want NFS server support. It is disabled by default in our RPMs.
